

Educational and Industrial Tour Report

1. Introduction

An educational and industrial tour is an important part of academic learning that provides students with practical exposure and real-world experience. It helps students understand how theoretical knowledge is applied in actual industrial and academic environments. With this objective, Tikapur Multiple Campus organized an Educational and Industrial Tour for the students of BBA Third and Fifth Semester on February 23, 2026. The tour included a visit to Malika Steels Pvt. Ltd., Janaki-8, Pahadipur, Kailali, followed by a Peer Learning Program at Kailali Multiple Campus (KMC).

The main purpose of the tour was to enhance students' knowledge about industrial operations, management practices, and academic exchange through practical observation and interaction.

2. Objectives of the Tour

The major objectives of the educational and industrial tour were:

- To provide practical knowledge about industrial operations and production processes.
- To help students understand the organizational structure and management system of an industry.
- To observe the use of machinery, equipment, and modern technology in production.
- To promote academic interaction and peer learning among students.
- To bridge the gap between theoretical knowledge and practical application.

3. Visit to Malika Steels Pvt. Ltd.

The first destination of the tour was Malika Steels Pvt. Ltd., located at Janaki-8, Pahadipur, Kailali. Malika Steels Pvt. Ltd. is a well-established steel manufacturing company engaged in producing steel materials used in construction and infrastructure development.

During the visit, students were warmly welcomed by the company officials. The Production Manager, Mr. Dipak Mandal, provided detailed information about the company's history, objectives, organizational structure, and operational activities. He explained the overall production process, starting from raw material handling to the final production of steel products. Students learned about the working mechanisms of different machines and equipment used in the manufacturing process. The Technical Manager explained how raw materials are processed, shaped, and converted into finished

steel products using modern machinery and technology. He also explained the importance of maintenance, efficiency, and proper handling of machinery to ensure smooth production.

In addition, students were informed about quality control procedures and safety measures adopted by the company. The importance of workplace safety, use of protective equipment, and adherence to industrial standards were clearly explained. Students observed the real working environment of the industry, which helped them understand how management, labor, and technology work together to achieve organizational goals.

The visit provided valuable practical exposure and helped students gain knowledge about industrial management, production systems, and operational efficiency.

4. Peer Learning Program at Kailali Multiple Campus (KMC)

After the industrial visit, students participated in a Peer Learning Program at Kailali Multiple Campus (KMC). The purpose of this program was to promote academic interaction, knowledge sharing, and collaboration between students of different campuses. During the peer learning session, students shared their academic experiences, ideas, and learning methods. They discussed various topics related to business studies, management practices, and career opportunities. This interaction helped students develop communication skills, confidence, and a broader academic perspective.

The program also helped in building academic relationships between Tikapur Multiple Campus and Kailali Multiple Campus. It encouraged collaborative learning and provided students with an opportunity to learn from each other's experiences.

5. Learning Outcomes

The educational and industrial tour was highly beneficial for the students. The major learning outcomes of the tour include:

- Better understanding of industrial operations and production processes.
- Knowledge about the organizational structure and management system of an industry.
- Understanding the importance of technology, machinery, and safety measures.
- Practical exposure to real-world business and industrial environments.
- Improved communication, interaction, and academic collaboration skills.

- Enhanced motivation and interest in learning and professional development.

6. Conclusion

The Educational and Industrial Tour was highly informative, practical, and beneficial for the students. It helped bridge the gap between theoretical knowledge and practical application. The visit to Malika Steels Pvt. Ltd. provided valuable insights into industrial operations, while the peer learning program at Kailali Multiple Campus enhanced academic interaction and knowledge sharing.

Overall, the tour was a successful and enriching learning experience that contributed significantly to the academic and professional development of the students.

Glimpses of the Educational and Industrial Tour.
